Hi Fran,

I am happy to talk to you about the Tower Standard LUST site. If you want to talk about the goals and technical aspects of the HRSC work, then we should have Tom Kady from the Edison office on the call with us. He developed the 4DIM modeling presentation for the workgroup. I know that Tom is out of the office today but I can catch up with him on Monday. I will ask him to send the presentation slides to you and also ask about his availability for the call time.

Regards,

Bob

Hi Bob,

I wanted to touch base with you regarding your efforts on this site. I'll send along an invite to find a time next week. In the interim, could you please send along a copy of the presentation.

Thanks and look forward to the discussion,

Fran

Group--

For our call tomorrow (1-2 pm eastern time), Bob has provided the two attachments for the Tower Standard site. I'll also upload them to our OneDrive site. Though Bob won't be with us tomorrow, Tom Kady will give the presentation and Bob will be happy to continue the conversation when he rejoins us for the next call on April 20th.

Hi Hal,

I provided some background information to Tom Kady and a site figure for the Tower Standard site (attached). Tom will go over the information for the call because I have been assigned to attend a meeting with my supervisor and the Lac du Flambeau natural resources staff tomorrow and I will not be able to attend the call.

Tom is very capable of providing the overview as a lead-in to his information on the HRSC work at the site. I did not want to cancel the presentation at the last minute. I can provide answers to questions at our next call and I hope Tom and I can provide an update to the model after we

collect more groundwater information and have a more complete CSM.

Please let me know if you have any questions and accept my apology for missing the call.

Regards,

Bob

Group--

During next week's call we will have a presentation by Tom Kady and Bob Egan on the use of high resolution site characterization for the Tower Standard site in R5.
